UJAS PATEL

New York, NY | upatel1998@gmail.com | +1 312-783-8443 | ujaspatel123.github.io | ujas-patel-184585335

Professional Summary

Research professional with **5+ years of experience conducting studies and managing research data** from collection and quality control through analysis, visualization, interpretation, and reporting across academic and industry settings. Seeking to apply research, analytical, and study coordination expertise to **clinical research, life sciences, or health data roles**.

Experience

Waypoint Bio, Inc. | Associate Scientist — *New York, NY | Feb 2025 – Jun 2026*

- Executed and coordinated **preclinical studies** evaluating CAR-T cell immunotherapies, managing study activities from experimental execution and data collection through analysis and interpretation of study outcomes
- Generated and analyzed experimental datasets from **cell-based and flow cytometry assays**, applying quality-control procedures to support accurate, reproducible, and interpretable study data
- Contributed to **assay development, experimental design, and protocol optimization** by selecting assay conditions, troubleshooting workflows, and refining methodologies to improve data quality and reproducibility
- **Characterized immune cell populations and functional responses** by performing and optimizing multi-parameter flow cytometry and cell-based assays, generating quantitative data to support biomarker and PK/PD-type assessments
- Maintained rigorous research documentation and data traceability, including **laboratory notebooks and technical reports**, while collaborating cross-functionally to communicate findings, resolve study issues, and support study timelines

University Health Network | Graduate Student Researcher — *Toronto, ON | Sep 2021 – Sep 2024*

- Led a translational health research project from study design through data collection, analysis, interpretation, and scientific reporting, managing complex research datasets and integrating findings across multiple experimental approaches; **first-author publication: Patel, U.A., Shi, M.Y., et al., *Molecular Cancer Therapeutics* (2025)**
- Designed and executed complex ***in vitro*** **cell-based, fluorescence-based imaging, and** ***in vivo*** **xenograft studies** to investigate radiation response and molecular mechanisms, generating quantitative datasets for downstream analysis and interpretation
- Organized, analyzed, and visualized research datasets using **Microsoft Excel and GraphPad Prism**, applying quantitative analysis workflows to identify trends, evaluate study outcomes, and support interpretation of experimental results and scientific conclusions
- Secured $30,000 in **competitive research funding from the Canadian Institutes of Health Research (CIHR) and STARS21 training program** to support research activities
- Communicated research findings through **scientific presentations and publications**, presenting at **institutional and national scientific meetings** and translating complex results into clear reports and presentations for research audiences

Sleep & Human Evolution Lab, UofT | Lab Manager — *Mississauga, ON | Sep 2018 – Jul 2021*

- **Coordinated research studies across multiple locations**, collaborating with cross-functional research teams to support study workflows, data collection, and dissemination of findings
- Developed standardized protocols for processing, cleaning, and analyzing sleep data, **improving consistency, reproducibility, and data quality** across multiple research projects
- Maintained and managed a **master research database** using Microsoft Excel and R, ensuring accurate data organization, quality, and accessibility for downstream analysis and reporting
- **Trained graduate students on standardized data-processing workflows**, promoting consistent application of protocols and best practices across research projects

Healthcare & Patient Experience

William Osler Health System | Hospital Volunteer — *Brampton, ON | May 2015 – Aug 2021*

- Supported patients and clinical staff through **appointment registration, wayfinding, interpretation, clinical-unit assistance, COVID-19 screening, and vaccination-clinic operations**, providing patient-facing support in a hospital environment

Education

University of Toronto | Master of Science, Medical Science — *Toronto, ON | Mar 2024*

University of Toronto | Honors Bachelor of Science, Biology — *Mississauga, ON | Jun 2020*

Certifications

Epidemiology: The Basic Science of Public Health | University of North Carolina — *Aug 2026*

Good Clinical Practice (GCP) | NIDA Clinical Trials Network — *Jun 2026*

Skills

Data Tools: Microsoft Excel, R/RStudio, SQL, GraphPad Prism
Research Tools: Flow Cytometry, ImageJ/FIJI, SnapGene

Awards

Richard P. Hill Award | Department of Radiation Oncology, University of Toronto — *Jun 2026*

Ontario '5-year Volunteer Service' Award | William Osler Health System — *Aug 2021*
